

# Lore Rapid Fire Screenshots

Automatically take full-resolution screenshots (png format) of your entire main monitor every 2-3 seconds while you work for as long as you want. Perfect for capturing slides and chats from web conference calls (MS Teams, Zoom, etc.), taking still images from live web camera feeds used for surveillance or from online videos, creating instructional blog posts for software tutorials with time-lapsed images, and more. (Windows only).

One-click operation that couldn't be easier as it captures your main display unobtrusively. No software

installation and runs easily from a USB drive or SD card (recommended 64GB of free space for saving screenshots). Just launch the main program (double-click "lore-rapid-fire-screenshots.exe" and you're off to the races.)

lore-rapid-fire-screenshots.exe

### Product Details

Zip file with a project folder containing applications and supporting files.

Instructions:

1. After downloading, right-click "Lore-RFS.zip" and choose "Extract All..."
2. Then copy the contents to an SD card (recommended 64GB of free space for saving screenshots) or a folder on your computer.
3. Double-click "lore-rapid-fire-screenshots.exe" inside the folder "project\_001" to run.

Lore-RFS > project\_001

Name	Date modified	Type	Size
config	2022-05-28 11:16 AM	File folder	
licenses	2022-05-08 7:59 AM	File folder	
logs	2022-05-28 10:47 AM	File folder	
screenshots	2022-05-15 10:06 PM	File folder	
lore-rapid-fire-screenshots.exe	2022-06-02 7:44 PM	Application	315 KB
lore-subprocess-capture-one-png.exe	2022-06-02 7:44 PM	Application	284 KB

A window will pop up like the one shown below:

```

F:\Lore-RFS\project_001\lore-rapid-fire-screenshots.exe
lore-rapid-fire-screenshots.exe v1.0.2022

-- Screenshots of your main display will be saved every 2-3 seconds,
-- depending on your system, monitor resolution, and scenes.
-- Edit 'config.txt' at '\config\rapid_fire_screenshots'
-- and save the number of screenshots to take as a whole number.
-- '30000' should be around 24 hours, depending on image details.
-- If 'config.txt' does not exist, the number of screenshots will default to '30000'.
-- They will be saved as png files at '\screenshots\rapid_fire_screenshots'

-- Minimize this window while it captures screenshots as you work.
-- Leave your main monitor on while the program is running to avoid errors.
-- Start time UTC: 22:41:30.809744500

-- Number of screenshots to take: 30000
-- Press and hold down the 'END' key to quit early.

Capturing screenshots
Screenshot: 1 -- Press and hold down 'END' to quit early
Screenshot: 2 -- Press and hold down 'END' to quit early

```

Minimize it and let the program capture screenshots automatically of everything that is displayed on your main monitor.

Press and hold down 'END' to quit taking screenshots at any time.

Your screenshots are saved in the folder '\\Lore-RFS\project\_001\screenshots\rapid\_fire\_screenshots\'

Lore-RFS > project\_001 > screenshots > rapid\_fire\_screenshots
